

PHILIPS INTELLIVUE G7

ABOUT

The Philips IntelliVue G7 Gas Module is an advanced gas monitoring system designed to provide comprehensive and accurate analysis of respiratory gases during anesthesia and intensive care. It integrates seamlessly with Philips IntelliVue patient monitors to deliver real-time gas measurements and enhance patient safety.

FEATURES

Comprehensive Gas Monitoring: Measures a full range of respiratory gases, including O₂, CO₂, N₂O, and anesthetic agents

Real-Time Analysis: Offers continuous, real-time gas analysis with rapid response times

Seamless Integration: Integrates smoothly with Philips IntelliVue patient monitoring systems

Advanced Safety Features: Includes automated agent identification, breath-by-breath analysis, and alarm systems

User-Friendly Design: Features an intuitive interface and easy-to-read display

DIMENSIONS

Width: 2.8 in (7.3 cm)

Height: 4 in (10.4 cm)

Depth: 6.5 in (16.7 cm)

Weight: 1 lb (1.0 kg)
